MADELINE H. STEFFY, Prop.

Dear Customer:

This catalogue has been compiled and will be received at a time when the entire world is really in a sorry state of turmoil. How thankful we should be that we are Americans.

You will note that our catalogue again contains a complete listing of Mum cuttings, Carnations, etc., together with a list of Florists' seeds.

After carefully studying the merits of each, we have listed what we consider the best commercial values in our seeds, plants, insecticides, etc.

In our list of "Tried and Tested Mums and Pompons," you will find varieties that should be a real asset to your selection for this season.

To our customers we wish to express our thanks for the considerations shown us during the past year, for you have graciously borne with us in our efforts to secure for you your Florists needs, and may we offer you our assurance that we will continue to extend our efforts to fill your future needs in our business relations.

It will always be our policy to continue to offer the "good service" and "courteous treatment" which has characterized our firm from its very conception. These business attributes are enjoyed by all of our old customers and we know will be appreciated by our many new customers.

Trusting that you may enjoy a prosperous 1942, and looking forward to a continuance of our business relations, we are

Sincerely yours,

GEO. K. GROFF

# Novelty Section

## Introductions for 1942

### De Petris Introductions

**PENROD**—Medium-sized pernet yellow. Very fine incurved form similar to the old variety Bonnaffon. Possesses good substance giving the variety good keeping as well as good shipping qualities. A free and easy grower with good stem and foliage. Matures Nov. 10th but can be easily held for a week later.

**EUROPA**—An intense cardinal red single of outstanding brilliance and exceptional substance. It may be grown either as a single disbud or as a disbudded spray. The color improves any existing red single. A very brilliant red on the reverse. It is fairly easy to grow. The spray formation is stiff and rigid. Matures Nov. 5th.

**CAMBRIA**—A free growing commercial variety of average size. Form very closely incurved. Color intense, golden bronze with a metallic sheen. It is very easy to grow and quite resistant to disease. Produces two blooms to the plant very uniformly. Matures October 25th.

**ORANGE BELLE**—Small flowered pompon with good form and substance. Color reddish orange rust. Very free growing habit with small but very persistent foliage. Good spray formation on wiry stems which attain a good length. We believe this will prove a profitable variety for the grower. Matures in late November and early December.

---

### Yoder Brothers Introductions

**CAMEO**—An ivory pompon of unusual size and substance that blooms the same time as Yuletide, Cordova and Silver Star. The growth habit is superior to any worth while variety in its color class and blooming season. The flower is large and of an attractive form. It should be the answer to the grower who demands a white or cream pompon for early December. Matures December 5.

**MATADOR**—A rich red anemone of large size and after the style of Crimson Glow. It improves that variety in every respect. The stems are stiff and straight with the flower held rigidly and erect. The form is excellent, color is very bright and vivid. For disbudded sprays plant 7 x 8; pinch July 25th; grow 2 stems, 3 flowers per stem. As a single disbud, plant 7 x 8, last pinch August 5th; grow 3 stems. Matures December 5th.

**SONATA**—A very brilliant orange bronze single. The flower has a starlike appearance that enhances the beauty of any design, basket or bowl into which it is placed. The color is brilliant to the last; its keeping qualities are unusually good. Plant early on raised benches; last pinch August 1st. Matures December 5th.

**AMBERLITE**—A bright orange single of excellent substance and easy culture. It is a good producer and strong persistent grower. Does not require disbudding, best in natural sprays. Do not over crowd; plant 7 x 8; grow 2 stems. Matures Nov. 25th.

**ROSALIND**—A pink single that might be described as a Pink Yukon. The color is a clean medium pink. The growth habit is excellent; a very free grower; medium sized stem and foliage; no tendency to blindness. It flowers at a time of the year when pink is scarce. Matures December 20th.

---

### A FEW GOOD SPORTS

**YELLOW SNOW**—A bright pernet yellow sport from Snow. The form and growth habit are identical with the original. Because of its season, December 30th, heavy production and excellent color, this variety will prove to be one of the most valuable additions to the late pompons.

**RED BRISTOLITE**—A good red sport from Bristolite. Red Bristolite is better as a red than Bristolite is as a bronze. It must be planted close to secure production. Use soft cuttings, clean rich soil; grow 2 stems. Matures November 25th.

**BRONZE PROSPERITY**—A deep orange bronze sport from Prosperity. The color is excellent. Best grown on raised benches, or if in ground beds, plant early. Last pinch July 20th. Matures December 10th.

**YELLOW CRYSTAL JEWELL**—A sport from Crystal Jewell. The color is Lemon Yellow with the green center being entirely eliminated. Good growth and production. Matures Nov. 10.

Price, \$4.00 per 100; \$37.50 per 1000

Prices on all 1942 Introductions—(Except Yellow Crystal Jewell)  
Rooted Cuttings—\$2.50 per 10; \$15.00 per 100; \$125.00 per 1000
